SUMMARY

Cloud & DevOps Engineer with hands-on experience in Microsoft Azure, Azure DevOps, Terraform, Linux, Git/GitHub, and Azure Networking. Skilled in Infrastructure as Code (IaC), Azure Landing Zone, CI/CD pipelines, cloud infrastructure deployment, automation, and building secure, scalable cloud solutions. Seeking an entry-level Cloud/DevOps Engineer role to apply my skills and continuously grow in cloud technologies.

Skills

- **Cloud Platform :-** Microsoft Azure
- **Infrastructure as Code :-** Terraform , Reusable Terraform Modules
- **Containers :-** Docker, Kubernetes(Basics)
- **CI/CD :-** Azure DevOps, GitHub Actions
- **Version Control:-** Git, GitHub
- **Operating System :-** Linux (Ubuntu), Windows
- **Networking :-** VNet, Subnet, NSG, TCP/IP, Load Balancer, App Gateway, DNS ,VPNs
- **Azure Services :-** Resource Group, Virtual Machine, Azure Bastion, Storage Account
- **Concepts :-** DevOps ,Cloud Computing , infrastructure Automation ,Azure Landing Zone Hub-spoke Architecture

EXPERIENCE

DevOps Engineer

DevOps Intern | DevOps Insider

Dec 2025 – June2026

- Automating Azure infrastructure deployment using Terraform.
- Building and maintaining CI/CD pipelines.
- Managing Azure resources including VMs, VNets, Storage Accounts, and NSGs.
- Configuring monitoring and alerting.
- Using Git and reusable Terraform modules.
- Assisting in troubleshooting deployment and Linux issues.

Projects

Reusable Infrastructure Deployment Using Terraform on Microsoft Azure

- Developed reusable Terraform modules for Azure infrastructure.
- Provisioned VMs, VNets, Subnets, and Storage Accounts using Infrastructure as Code (IaC).
- Automated resource deployment using `for_each`.
- Managed Terraform state files to track infrastructure changes and maintain desired state.
- Used Terraform lock files to ensure consistent provider versions across environments.

Azure Network Infrastructure & Security Setup

Azure VNet, Subnet, NSG, Bastion, Virtual Machine, VPN Gateway

- Built Azure VNets and Subnets for secure network infrastructure.
- Configured NSGs to control and secure network traffic.
- Configured Azure Bastion and VPN Gateway for secure VM access and connectivity.
- Provisioned and managed Azure Virtual Machines.
- Troubleshot network connectivity issues and ensured smooth resource communication.

EDUCATION

Bachelor of Computer Applications (BCA) | JP Institute of Technology
| 2023-2026
